

✦ Design System & UI Guidelines

Welcome to the official Design System for **amrsamir.me**. This document acts as the single source of truth for the platform's visual language, bridging the gap between the public-facing minimalist architecture and the secure, functional admin panel.

1. Core Philosophy

The overarching aesthetic is rooted in **minimalism, focus, and raw performance**. The public website acts as a developer-centric portfolio (inspired by CLI/terminal interfaces), while the Admin Panel introduces structured glassmorphism for enhanced usability—while still offering a "Classic Black" toggle for aesthetic parity.

[!TIP]

Performance First

The design system relies heavily on Vanilla CSS and native browser capabilities to ensure lightning-fast load times. We avoid heavy CSS frameworks like Tailwind or Bootstrap to keep the bundle size minimal.

2. Design Tokens

These are the fundamental building blocks (variables) used across the platform.

Color Palette

Token Name Hex Value Usage context

--bg-primary	#000000	Main backgrounds, core canvas.
--bg-secondary	#0a0a0a	Elevated surfaces, cards in dark mode.
--border-color	#333333	Subtle outlines, dividers, inputs.
--text-main	#ededed	Primary body text and headings.
--text-muted	#888888	Secondary text, placeholders, metadata.

Typography

We utilize a modern, highly legible font stack optimized for digital interfaces.

```
graph LR
  A[Primary Font Stack] --> B(Geist)
  A --> C(Inter)
  A --> D(System Defaults)

  E[Monospace Stack] --> F(Fira Code)
  E --> G(Consolas)
  E --> H(Menlo)
```

- **Body Text:** 16px (1rem) with a line-height of 1.6.
- **Headings:** Semi-bold (600) scaling down for mobile responsiveness.
- **Micro-copy:** 14px (0.875rem) for hints and small labels.

3. The Dual-Theme Architecture

The Admin Panel features a unique Dual-Theme architecture, allowing the owner to switch between a rich, interactive environment and a focused, stark environment.

```

```css
/* THEME 1: Glassmorphism (Default) */
.glass-panel {
 background: rgba(30, 41, 59, 0.5);
 backdrop-filter: blur(12px);
 border: 1px solid rgba(255, 255, 255, 0.05);
 border-radius: 16px;
}
...

<!-- slide -->
```css
/* THEME 2: Classic Black (Strict Minimalist) */
body[data-theme="classic-black"] .glass-panel {
  backdrop-filter: none;
  background: var(--bg-secondary);
  border: 1px solid var(--border-color);
  border-radius: 6px;
}
...

```

Theme Behaviors:

1. **Glassmorphism:** Relies on backdrop-filter: blur(), abstract floating CSS animations (the "blobs"), and slightly rounded corners (16px).
2. **Classic Black:** Disables all background animations, removes background blurs, enforces #000 and #0a0a0a backgrounds, and sharpens border radii to 6px for a strict, terminal-like feel.

4. Components

Inputs & Forms

Forms follow a strict vertical layout with top-aligned labels.

- **Padding:** 14px 16px
- **Focus State:** Uses a solid primary color border with a subtle box-shadow ring to indicate active focus.

Buttons

Buttons are strictly constrained to necessary actions.

- **Primary:** Solid background using the accent color, high contrast text.
- **Secondary:** Transparent background with a subtle border, used for secondary actions like "Refresh" or "Toggle Theme".

5. UI/UX Flow (Mind Map)

Here is a visual map of how a user (both public and admin) navigates the design system.
